**INSTITUTO GEOGRÁFICO NACIONAL DE COSTA RICA**  
The National Geographic Institute of Costa Rica is a public institution that provides geographical information and services to the government and the public. It is responsible for the production and dissemination of maps, atlases, and other geographical products. The Institute also conducts research and provides technical assistance in the field of geography and cartography. It is a member of the International Geographical Institute and the International Geographical Union. The Institute was founded in 1944 and has since then been working to improve the geographical knowledge and skills of the Costa Rican population. It has a long history of providing high-quality geographical information and services to the country and the region. The Institute is committed to promoting the use of geography in the development of the country and the region. It is a key institution in the field of geography and cartography in Costa Rica.
